FOREWORD

This volume is the twenty-sixth annual edition of the McMaster Year Book; and is another milestone, as the title 'Marmor' suggests, in the life of our University here in Hamilton.

With the attainment for her independence this session, McMaster has entered into a new era. This new era has already seen great advancement and expansion in both facilities and prestige which, we are confident, can only be limited by Progress herself.

As we leave behind us our first quarter century of Publication and set out upon this new era, we feel it is fitting to catch the same spirit of advancement, and so we have taken the liberty of introducing several changes into the design and layout of this volume. The most drastic innovations are the new, padded leatherette cover, the introduction for the first time of coloured plates; and an entirely revolutionary method of printing.

We have tried to cover as comprehensively as possible all campus activities. And we have endeavoured to maintain the high standard set by Marmor staffs in previous years.

It is our hope that this volume will give each student many hours of pleasant memories in times to come of the precious years spent within these walls.

R. MacARTHUR SHIELDS.

DEDICATION

After seventy years, McMaster University is being reorganized as a private, non-denominational institution. During these seventy years, it has been chiefly in the care of members of the Baptist Convention of Ontario and Quebec, who, like the founder, Senator William McMaster, have given it their love and their wealth. To the Board of Governors has fallen the often unrecognized task of making its life possible, and they have been faithful trustees. To them, therefore, this volume is respectfully and gratefully dedicated, in the assurance that their work will set the tone of the University even though their responsibility passed into other hands. Among them, in recent years, the present Chairman of the Board has been a dedicated and able leader. He is Mr. Charles P. Fell, whose interests include the National Gallery as well as his church, the University and important business activities. His photograph appears on this page to represent all those who are and have been our Governors. His predecessors in office since 1887 were the Honourable John Dryden, D. E. Thomson, K.C., LL.D., the Honourable Albert Matthews, and the Honourable Mr. Justice R. L. Kellock, all eminent public figures and churchmen.

DR. G. P. GILMOUR

THE PRESIDENT'S MESSAGE

Snobbery and materialism are no more admirable for being old. And they are old though we think of them as modern, in higher education. When the Dean of Christ Church, Oxford, said early in the nineteenth century that men should avoid the so-called sciences and concentrate on "the study of Greek literature, which not only elevates above the common herd, but leads not infrequently to positions of considerable emolument", he was appealing to these two base but strong motives among gentlemen and scholars, who if they surrendered to them, could be neither truly gentlemen nor truly scholars. We need not try to prove that all educationists were once idealists in order to argue ourselves into idealism. We need just to be idealists, whether anyone else has been or now is.

Actually these base motives are corrupted forms of great ones. Snobbery is a love of the first-rate, but is based on its scarcity value not on itself. That does not however, alter the fact that education should develop in us a love of the first-rate, and a desire to make it universal if we can. Materialism is a love of security, usually based on its scarcity value or on a disregard for anything that is really worth securing. But it must be security in more senses than one the broadening base of material resources for all, and also the deepening core of spiritual security. Insecurity may be tolerable for a while in the realm of the spirit, but only when there is in life a sense of ultimate worth and heroic trust. Educated people should deal with the first-rate and with that which abides, and with nothing else. A cult of vulgarity is just inverted snobbery, and a cult of rootlessness is just an inverted hunger for home.

I am not sure just what "knowledge for its own sake" is, but I suspect it has connections with this love of the first-rate simply because it is first-rate, and with this sense of security that is based on inner resources and not on marketable goods or services. So, in the Name of Christ, I commend to McMaster people an ideal of education that is unashamedly ashamed of snobbery and materialism and unashamedly eager for that which is high and imperishable. We have ultimately no real values and no real roots apart from God.

G. P. GILMOUR.

INTRODUCTION TO THE CHANCELLOR ROY L. KELLOCK, Q.C. LL.D.

A native of Perth, Ontario, Chancellor Kellock graduated from McMaster in 1915 to become one of the University's most illustrious sons. Graduation from Osgoode Hall in 1920 has led to an eminent legal career. A member of the firm of Mason, Foulds, Davidson and Kellock, he was appointed King's Counsel in 1934 and left private legal practice in December, 1942, to become judge of the Court of Appeal of Ontario. In 1944 he was appointed a puisne judge of the Supreme Court of Canada. As a member of the Supreme Court he has become well-known for his responsibilities in connection with spy investigations, marine disasters and railway settlements.

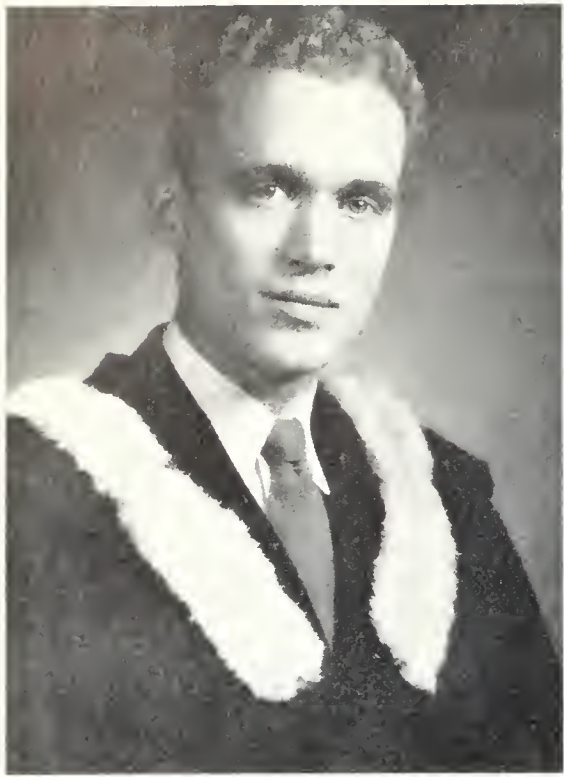

Despite the many onerous responsibilities he carries, Chancellor Kellock has never forgotten his Alma Mater. He has served on the governing bodies of the University since 1934, as a member of the Senate and the Board of Governors, and in 1948 was elected chairman of the Board of Governors in succession to the Late Albert Matthews.

Chancellor Kellock was elected to this office by the Board of Governors and the Senate in 1955.

Honour Society

Admitting a student to the Honour Society is the highest form of recognition that can be given to an undergraduate by his fellow students. To become a member of this Society the undergraduate must have a satisfactory academic record, and must have rendered valuable service to the University in non-athletic, extra-curricular activities. The honoured few receive a pin and a parchment, emblematic of the honour conferred upon them.

TEACH ME

(1) SCENE—SCHOOL DANCE

Bruce Mitchell played by Bruce Stock. Polly Fisher played by Peggy Webster. Melinda Grant played by Joyce Howe.

Situation: Polly annoyed by her friend Bruce's attention to Melinda, taunts her for having come alone, for wearing such a plain dress. This scene shows Melinda as a social outcast. (This is a rehearsal and the characters are not all in costume.)

(2) SCENE—BANDSTAND

Personae: Melinda Grant, Joyce Howe; Will Henderson, John Taylor; Polly Fisher, Peggy Webster. Polly accidentally comes upon Melinda and Will at the deserted bandstand. Polly is holding Melinda's costume for the school play. It is quite obvious that Polly is envious of Melinda's having the role.

(3) SCENE: MELINDA GRANT'S LIVING ROOM.

Personae: Miss Robson, Marjorie Stibbards; Melinda Grant, Joyce Howe; Mrs. Grant, Joan Kerr. Situation: Miss Robson, Melinda's teacher, anxious at Melinda's unhappiness, has come to visit her mother. Mrs. Grant is here showing her sewing to her daughter. (This was taken at rehearsal).

DRAMATIC

HOW TO CRY

(4) SCENE: SCHOOL DANCE

Personae: Will Henderson, John Taylor; Melinda Grant, Joyce Howe.

Situation: Will, having been snubbed by Polly Fisher, has introduced himself to Melinda. This is, needless to say, the beginning of their friendship.

(5) SCENE: GRANT LIVING ROOM.

Personae: Melinda Grant, Joyce Howe; Mrs. Grant, Joan Kerr.

Situation: The first scene of the play. As Mrs. Grant sews Melinda dutifully describes what a nice day she has had. In passing, she mentions "that awful Will Henderson", who is the new boy at school.

(6) SCENE: THE HENDERSON KITCHEN.

Personae: Will Henderson, John Taylor; Mrs. Henderson, Shellaugh McCullough.

Situation: As Will does his homework, his mother complains about the sort of place they have to live in. As usual, she is nagging at him in the hope that he will have a "higher set of values" than his father.

SOCIETY

(1) Don Stratton as Lord Chancellor with Chorus of Peers is bemoaning the fact that although he gives away his pretty wards he never gets one for himself.

(2) Outside the Houses of Parliament, the sentry, Bob Spencer, tells of the curious fact that all the children are born either Liberals or Conservative.

(3) The Fairy band along with their queen, Camilla Russell, summon Iolanthe from her life-long banishment.

(4) Having been seen with his youthful mother, Strephon, Tony Galasso, is accused of double-deal-

Iolanthe

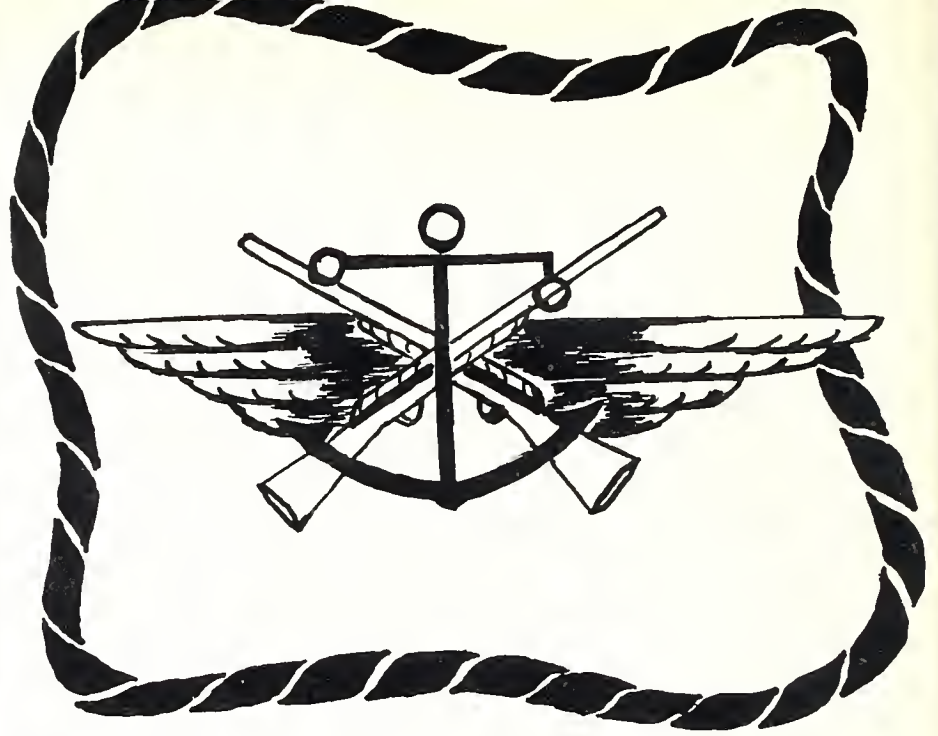

ing. The Queen and her band are seen chastising the peers for attempting to separate the two lovers.

(5) The Fairie Queen, Camilla Russell, changing the Fairie Law to read, "every Fairie who 'don't' marry a mortal shall die".

(6) The Queen has made Strephon a member of parliament and the fairies gleefully proclaim that he carries every bill and the Lords and Commons are both in the blues.

(7) Phyllis (Nancy Lyneburner) a ward in Chancery, dutifully appears before the Lords. Lord Montararaat (Fred Love, left) and Lord Tolloller (Pat Helps, right) along with the peers exclaim at her beauty.

1. Bob Judd and Mary Ann Sonn are going to get a bang out of this.
2. Diane Pond and Gord. Perault.
3. Van Taylor and Diane Perry have that happy calypso look.
4. Mr. & Mrs. Jerry Brock, and who knows?

TRI SERVICE

5. 1st Lt. Ankone admires Marcia Bristow.
6. Looks as if Allan Smart and Muriel Zinkewich must be enjoying themselves.
7. You're all wet dear!
8. Joan McEwan and Scot's wa'hae.

JUNIOR PROM

FLOAT PARADE

FLOAT PARADE

- (1) Dictation grow in North House?
- (2) This the Art Club (??)
- (3) Deposed Monarch returns.
- (4) The mad escorts from Suez.
- (5) Engineers (naturally).
- (6) All the World's a stage.
- (7) Well, girls — really !!
- (8) This is the reaction they promised ?
- (9) Sweet music soundeth on the ear.

KNOWLEDGE + OPPORTUNITY = SUCCESS

Yes — today in Canada we know that knowledge plus opportunity equals success. However, to ensure your chances of success, there is a PLUS factor which only you can contribute. When true skills and a pride in your endeavors are joined with the knowledge you have gained

at McMaster, and the opportunity which abounds in Canada today, your future is assured.

We at Studebaker-Packard of Canada, Limited offer you our sincerest wishes for a life of achievement and reward.

a smile costs nothing *

A smile costs nothing but creates much. It enriches those who receive it without impoverishing those who give. It happens in a flash and the memory sometimes lasts forever. It is rest to the weary, daylight to the discouraged, sunshine to the sad, and nature's best antidote for trouble. It cannot be bought, begged, borrowed or stolen, for it is something that is no earthly good to anyone until it is given away. And if in the hurry and rush of life you meet someone who is too weary to smile — leave one of yours. For no one needs a smile quite so much as he who has none left to give.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

"S'A FACT"

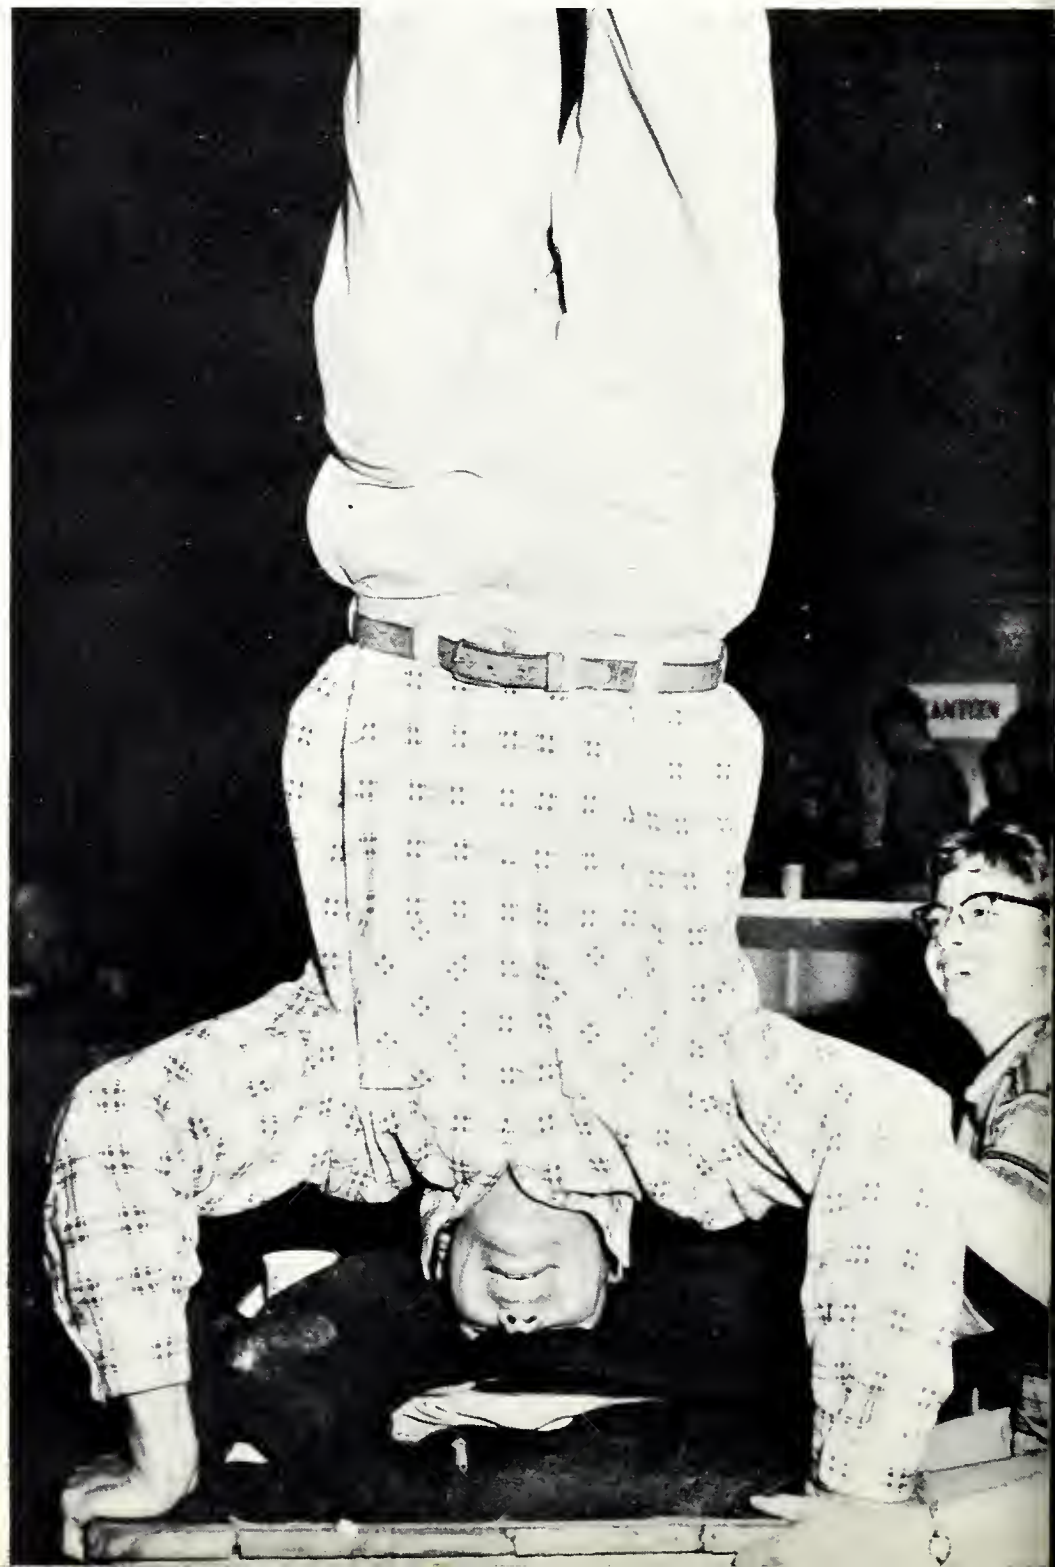

We wrack our brains a lot these days
With charts and plans and schemes
To make this world a better place
If only in our dreams.

We glibly prate of world-wide peace,
Of joys of men made free;
Of universal brotherhood,
And hands across the sea.

But while we plan this brotherhood,
To which we all aspire
Too little do we realize
It's simple to acquire.

To make the whole world better
Here's all you have to do—
Start to be a brother
To the man next door to you.

YOU CAN BE **SURE** ... IF IT'S **Westinghouse**

Our Pioneering Days are never done

When in 1831 a few farmers left their scythes to see Cyrus McCormick demonstrate the world's first successful mechanical reaper, they *really saw* the birth of mechanized agriculture. To the farmer, the blessed event meant an easier, more productive day. To you and me it meant *three meals a day*, for without mechanized farming as now practiced, adequate food production would be impossible.

The fact is, the pioneering that gave the world the McCormick reaper has been continued without

interruption ever since. In the McCormick farm equipment of today, bold new concepts of engineering, manufacturing and performance are constantly introduced to cut the costs and raise the efficiency of agriculture. That's why, for the latest and finest in farm tractors and machines, farmers still look to International Harvester, the direct corporate descendant of the original McCormick company . . . *because our pioneering days are never done.*

Traditional McCormick pioneering in the farm field has culminated in such modern machines as this McCormick No. 141 Self-Propelled Combine—a member of the most advanced, most efficient and most complete line of harvesting equipment to be found anywhere

Preparing for a lifetime of progress

He has the urge to be where "big things" are happening . . . so he is studying engineering.

Wherever you go in Canada today you can see the work of the professional engineer whose vision, initiative and orderly thinking are vital to progress in this swift-moving technological age.

When you flip a switch at home an amazingly intricate system of power equipment goes to work for you.

Electricity cannot be made and stored—it is made and delivered instantly at the speed of light. In effect, you reach back from your switch through wires, meters, transformers, substations, switch-gear, generators, turbines—right to the very source of power. This incredible process . . . safe, reliable and low-priced . . . has been made possible through the skills of professional engineers.

Less than 20 years ago only about one in 700 workers was a graduate engineer . . . today there is 1 to every 150 workers. At Canadian General Electric we employ nearly 1,000 engineers—approximately one to every 20 employees—and more are constantly needed to keep pace with the increasing demand for equipment to generate and transmit electric power and the many products which put it to work.

For over 50 years this Company has conducted a training programme for engineering graduates. In our plants, they acquire an intimate knowledge of the theoretical and practical principles of manufacture, design and installation. Known as the "Test Course" it has provided important postgraduate training for many of today's professional engineers in various fields of Canadian industry.

The future holds many engineering opportunities in Canada, where people are so electrically minded that the demand for power *doubles every 10 years!* Right now engineers are busy on products, projects and in industries that didn't even exist a few years ago, when many electrical developments, such as television, were practically unknown.

Canada's first atomic electric power plant presents one of the greatest engineering challenges of our time. It is being built by Canadian General Electric for Atomic Energy of Canada Limited and Ontario Hydro. This is just one of many great projects that exemplify the major role being played by professional engineers . . . key men in our nation's progress.

Progress Is Our Most Important Product

The Forward Look

**is a symbol of achievement... and
a promise of great things to come**

Today, throughout Chrysler of Canada's *Forward Look* family, you find advancements so modern that many are still only drawing-board dreams to other manufacturers. Many of these advancements, such as push-button automatic transmission, Full-Time power steering, and Total-Contact brakes are relatively recent, and, of course, readily associated with the youthful, progressive spirit of the *Forward Look*.

But, did you know that the first four-wheel hydraulic brakes . . . first high-compression engines . . . first adjustable front seats . . . first safety-rim wheels . . . and a score of other notable automotive "firsts" have also been associ-

ated with this *Forward Look* spirit over the past 30 years? And did you know that this same spirit has meant significant advances in truck engineering and industrial engineering as well?

There was no famous *Forward Look* name, or symbol for it, back in the earlier days of Chrysler of Canada's history. But the youthful spirit, the looking ahead, have always kept Chrysler in the forefront of progress. And we like to think that this same pioneering urge motivates all our young people as they move from the academic to the business world. For it is this that promises great accomplishments for all of us, whatever our chosen occupations, in the years that lie ahead.

You're always a step ahead in cars of the Forward Look

*how do you **measure** progress . . .*

Because progress is the priceless commodity that sets one company apart from the other, it can only be measured in material gain.

AT B-A, in the past ten years, progress has been made in great strides. Hundreds of new modern service stations have sprung up all over the country. And, as a direct result, refined petroleum sales have soared from ten million barrels in 1945 to over thirty-three million barrels in 1955.

KEEPING PACE with this growth, B-A is continually maintaining natural gas and crude oil reserves. Manufacturing facilities are being enlarged and extensive additions to refineries are being made to ensure maximum product improvements.

THE RESULT: *greater resources . . . higher quality products . . . better service . . . and a worthwhile investment for stockholders.*

PRACTICAL MEMENTOS AND CRESTED JEWELLERY FOR McMASTER GRADUATES.

The firm of Henry Birks and Sons has just introduced a new line of crested glassware. This new selection includes a mug, tumbler, oval ash tray, and covered cigarette box. The official crest, in full colour, is beautifully applied to each piece, and, best of all, it is under glaze so that it will last as long as the article itself. These attractive mementos are modestly priced.

The House of Birks, being the official jewellers for McMaster University, has designed a complete line of insignia and blazer crests as shown below.

Graduates Wishing to acquire one or more of these mementos should send their orders to:

THE BOOK STORE, McMASTER UNIVERSITY, HAMILTON

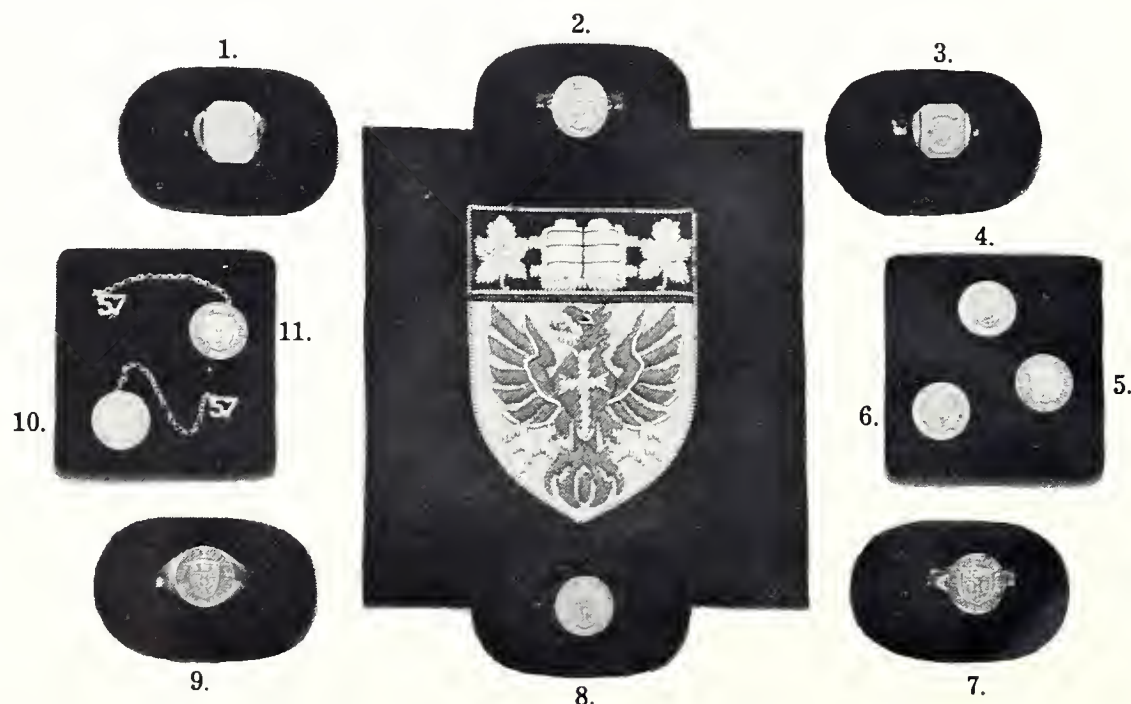

(Please include shipping charges in the cheque or money order, otherwise the articles will be shipped C.O.D.)

Not by a long shot! And it is quite a story about how Canada's first railway sleeping car was made in Hamilton under the initiative of pioneer mechanic-industrialist, Samuel Sharpe.

That led to the first dining car (roaring along the rails at 40 m.p.h.!) and a lot of other things being manufactured in this city for the first time.

For instance the first threshing machines were made here in 1837, the first telephone exchange in the British Empire was established in Hamilton, the first locomotive was made here; so were the first iron steamboat, the first sulphur matches, the first sewing machine, the first coal oil lamp burner — and the first Canadian through line railroad had its headquarters in Hamilton.

Some of these things have been forgotten, but among our "Firsts" The Hamilton Spectator still holds its position, having served and gained the confidence of the people of Hamilton since 1846, well over a century.

THE CERTIFIED PUBLIC ACCOUNTANTS ASSOCIATION OF ONTARIO

Graduates in Commerce and Finance interested in extending their practical and theoretical training in accounting will find The Certified Public Accountants Association of Ontario, incorporated in 1926, a very suitable medium.

Theoretical instruction is provided by courses conducted for the Association by the University of Toronto, Department of Extension, and practical training may be obtained with a public accountant or by general accounting duties in business.

Exemption from the First-year course and the Primary examination may, upon application be granted and an additional year may be allowed if the applicant has had acceptable accounting experience.

Membership in the Association gained by graduation as a "Certified Public Accountant" qualifies for a licence to practice in Ontario as a public accountant and opens many doors to high executive and administrative positions in industry and in the public service.

canada and You

Whatever your plans for the future, as a young Canadian, you stand in a particularly advantageous position. Canada is on the move, with huge power developments, new pipe lines, the seaway begun, and other large projects underway. And these developments are matched by the established of hundreds of smaller manufacturing plants and by the growth of older firms throughout the whole of Canada. This growth means opportunity to those who prepare themselves to meet the challenges that lie ahead.

Standing as you do, on the threshold of a new era, you are Canada's hope for the future . . . and that future has never appeared brighter.

a smile costs nothing

A smile costs nothing but creates much. It enriches those who receive it without impoverishing those who give. It happens in a flash and the memory sometimes lasts forever. It is rest to the weary, daylight to the discouraged, sunshine to the sad, and nature's best antidote for trouble. It cannot be bought, begged, borrowed or stolen, for it is something that is no earthly good to anyone until it is given away. And if in the hurry and rush of life you meet someone who is too weary to smile — leave one of yours. For no one needs a smile quite so much as he who has none left to give.
